

FOR IMMEDIATE RELEASE

TPA Stream Becomes an Approved Vendor of WEX®, Expanding Invoicing Solutions for Benefits Partners

WEX will offer TPA Stream's employer invoicing platform to Benefits partners nationwide

Cleveland, Ohio — June 1st, 2026 — TPA Stream, a provider of employer invoicing solutions purpose-built for Benefits and Medical TPAs, today announced that it is an approved vendor of WEX, a global leader in intelligent payment solutions and provider of comprehensive benefits administration technology.

Under the arrangement, WEX will now be able to offer TPA Stream's invoicing solution to Benefit TPAs, building on WEX's ability to simplify and streamline their employer billing operations.

"We're excited to formalize this relationship with WEX," said Eric Sukalac, Co-founder and CEO of TPA Stream. "WEX has deep relationships with benefits partners across the country, and we believe TPA Stream's invoicing platform is a natural complement to what WEX already brings to that market. Together, we can help TPAs eliminate the manual, disconnected workflows that slow down billing and create costly errors."

TPA Stream helps Benefits and Medical TPAs turn scattered billing and administrative data into accurate employer invoices — without replacing the systems their teams already rely on. The platform is SOC 2 Type II compliant and integrates with the tools TPAs use day to day.

WEX is a leader in simplifying the complex benefits landscape, offering an integrated suite of administration solutions spanning from enrollment to COBRA and HSA management. Building on the momentum of a strong 2025 open enrollment season, WEX now supports over 9.4 million HSA accounts, maintaining its standing as a top-five provider and a trusted partner to approximately 60% of the Fortune 1000. This scale underscores WEX's ability to deliver intelligence-led solutions that meet the evolving needs of the modern workforce.
