

Qualify your employees for better benefits and control rising costs.

Beacon provides historical healthcare claims insights to your Benefits Advisor using historical claims data from Explanation of Benefits (EOBs). Using these insights, you can confidently move to a self-funded plan and qualify for stop-loss insurance, or select a fully insured plan that better meets the group's needs.

No more time-consuming or invasive questionnaires—just actionable insights. You'll have access to summary reports so you can see how your employees use their benefits and have a productive and informed planning process with your Benefits Advisor.

1. Employer Connects

We make employer onboarding easy, with just a few fields to complete and automatic census importing.

2. Employees Enroll

Employees are automatically prompted to enroll and connect to their health plan's member portal. We're experts in driving enrollment and offer an Employer Success Kit to help get high participation rates and an accurate picture of your needs.

3. We Harvest Claims

EOBs and data are securely housed in a HIPAA-compliant, SOC II Type 2 database, and identifiable data is never shared with employers. All data is de-identified for the Benefits Advisor.

4. Access Planning Insights

Monitor enrollment, automatically send communications, and access aggregate spend reports for unmatched insights.
