Beacon
BY TPA STREAM

Benefits data and analytics software for employers and their advisors based on real claims data.

Employer Overview

Gather insights on how your benefits plans are used

TPA Stream is a insurance technology company that builds HIPAA-compliant and secure software to help companies administer and assess benefits.

Using their product Beacon, you'll learn how your health benefits plan is used by your employees using their claims data. This is important to developing a benefits plan suited for your employees' unique needs.

Securely harvest claims details for benefit types including:

- Medical
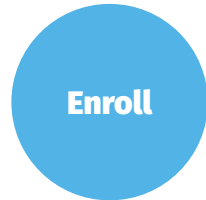

- Dental

- Vision

- Prescription (Rx)

How Beacon Works

How Beacon Works

In less than 30 days, your broker will have detailed insights on how the plan's used and what's needed for next year.

Connect → **Enroll** → **Harvest** → **Assess**

Connect
We make employer onboarding easy, with just a few fields for you to fill out to access Beacon.

Enroll
Employees get an email prompting them to securely connect their health plan to Beacon.

Our Employer Success Kit helps you get everyone connected quickly.

Harvest
EOBs and data are securely housed in a HIPAA-compliant, SOC II Type 2 database.

The instant we have a connection, we start crunching the numbers to help you and your broker see how your benefits are being used.

Assess
Your broker will have the insights they need for more accurate plan creation and cost savings.

You'll be able to track benefits spend and utilization, giving you more context before annual enrollment.

Beacon
BY TPA STREAM

Step by step

Step 1: Set up your account

Your broker will send you an email through Beacon with a unique link to set up your company's Beacon account. Have the following details ready: company and contact information, and payment information.

Step 2: Review success kit materials

Check out the employee emails, collateral and employee FAQs in your success kit. These are designed to explain **why** and **how** to connect their health plan.

Step 3: Add employees & send

Depending on your broker, you may need to upload your employee census or the broker will do so for you. Employees will be emailed with a unique link prompting them to connect Beacon with their health plan. Our outreach plan of emails and reminders lasts 2 weeks.
